SUMMARY

Computer Science postgraduate engineering scalable full-stack and AI-driven systems for real-world applications. Designed and implemented machine learning pipelines for semantic matching and intelligent data processing, integrated with high-performance backend services and RESTful APIs. Experienced in cloud-based deployment, system design, and building production-ready applications with a focus on scalability, efficiency, and real-world impact.

EDUCATION

Expected 2028 Integrated BTech & MTech, Computer Science and Engineering (5-Year Program) at **Sri Krishna College of Engineering and Technology (SKCET), Coimbatore** (CGPA: 8.11)
2023 Class XII (Higher Secondary) at **CMS Vidya Mandir Matric Higher Secondary School, Coimbatore** (89.5%)

PROJECTS

SKCET-Navigator — Campus Navigation & Utility App *React + Vite, Node.js, Google Maps API*

- Built a campus web app with voice-guided turn-by-turn navigation (Web Speech API), a Smart Faculty Finder, and a crowd heatmap using Google Maps HeatmapLayer with time-based density data.
- Integrating an AI campus assistant via Groq SDK (Llama 3) and indoor mapping for an end-to-end campus utility experience.

AI Resume Screening System *Python, Sentence Transformers (SBERT), FastAPI, Vector Database, React*

- Built a semantic resume screening pipeline using Sentence-BERT (all-MiniLM-L6-v2) to encode resumes and job descriptions into dense embeddings, ranked via cosine similarity for automated candidate short-listing.
- Exposed REST endpoints via FastAPI integrated with a React recruiter dashboard; fine-tuned the model on domain-specific HR data to improve matching accuracy for technical roles.

AI Predictive Health Platform *Python, Node.js, Express, MongoDB, Scikit-Learn*

- Built an AI-driven healthcare platform utilizing Python-based machine learning models to predict the risk of 7+ critical conditions (including heart disease, diabetes, and pneumonia) from patient data parameters.
- Designed an innovative "Digital Health Twin" simulation feature and a smart recommendation engine, enabling users to model lifestyle scenarios and receive personalized, data-backed health insights.

SKILLS

Languages	Python, Java, JavaScript, C
ML & Data Science	Sentence Transformers (SBERT), scikit-learn, pandas, NumPy, Hugging Face, NLP, Cosine Similarity, Model Fine-tuning
Web Development	React.js, Node.js, Express.js, FastAPI, HTML, CSS, REST APIs
Databases & Tools	MySQL, MongoDB, Git, GitHub, Postman, VS Code, Eclipse, Jupyter Notebook
Core CS	DSA, OOP, DBMS, OS, Computer Networks

ACHIEVEMENTS & COMPETITIONS

- Runner-up — HackSprint 2026 (iamNeo, an IIT venture)
- 55th Place — Amazon ML Challenge 2026 (ML hackathon among thousands of participants nationwide)
- Participant — Smart India Hackathon (SIH) 2026, Government of India's largest student innovation hackathon

CERTIFICATIONS

- Cloud Quest: Cloud Practitioner (AWS)
- Networking Basics (Cisco)
- Introduction to Cybersecurity (Cisco)
- Basic PL/SQL in Oracle (Infosys Springboard)
- DSA Using Java (Infosys Springboard)
